

## other beams & pinned frames

Pinned Frames 1  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2009abn

## Continuous Beams

- statically indeterminate
- reduced moments than simple beam

Pinned Frames 2  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Continuous Beams

- loading pattern affects  
– moments & deflection

Pinned Frames 3  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Continuous Beams

- unload end span

Pinned Frames 4  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Continuous Beams

- unload middle span

Pinned Frames 5  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Moment Redistribution

- continuous slabs & beams with uniform loading
  - joints similar to fixed ends, but can rotate
- change in moment to center =  $\frac{wL^2}{8}$ 
  - $M_{max}$  for simply supported beam

Pinned Frames 6  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Moment Distribution (a)

- no load

<http://nisee.berkeley.edu/godden>

Pinned Frames 7  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Moment Distribution (b)

- add load

<http://nisee.berkeley.edu/godden>

Pinned Frames 8  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Moment Distribution Method (c)

- release joint 2

<http://nisee.berkeley.edu/godden>

## Moment Distribution Method (d)

- release joint 3

<http://nisee.berkeley.edu/godden>

Pinned Frames 9  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

Pinned Frames 10  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Moment Distribution Method (e)

- exposure of final shape after cycles over initial shape

<http://nisee.berkeley.edu/godden>

## Analysis Methods

- **Approximate Methods**
  - location of inflection points
- **Force Method**
  - forces are unknowns
- **Displacement Method**
  - displacements are unknowns

Pinned Frames 11  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

Pinned Frames 12  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Theorem of Three Moments

- moments at three adjacent supports (2 spans)
- distributed load and same I:

$$M_1 L_1 + 2M_2 (L_1 + L_2) + M_3 L_2 = -\frac{w_1 L_1^3}{4} - \frac{w_2 L_2^3}{4}$$

- concentrated loads and same I:

$$M_1 L_1 + 2M_2 (L_1 + L_2) + M_3 L_2 = -\sum P_1 L_1^2 (n_1 - n_1^3) - \sum P_2 L_2^2 (n_2 - n_2^3)$$

Pinned Frames 13  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Pinned Frames

- structures with at least one 3 force body
- connected with pins
- reactions are equal and opposite
  - non-rigid
  - rigid

Pinned Frames 15  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

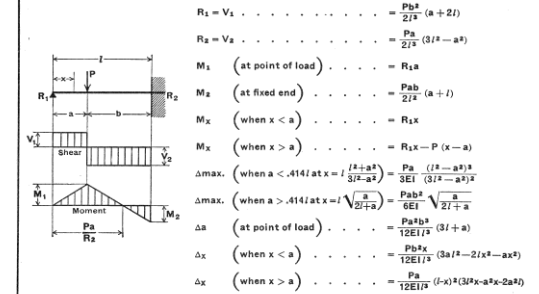

## Two Span Beams & Charts

- equal spans & symmetrical loading
- middle support as flat slope

Pinned Frames 14  
Lecture 10

14. BEAM FIXED AT ONE END, SUPPORTED AT OTHER—  
CONCENTRATED LOAD AT ANY POINT

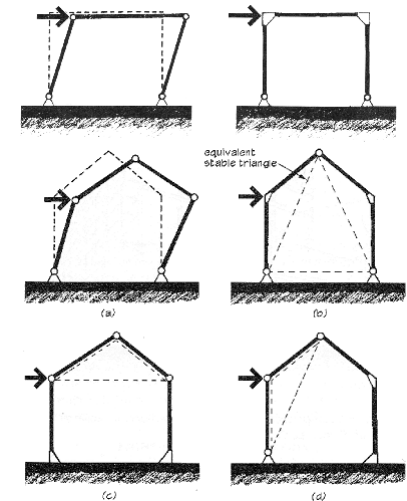

Elements of Architectural Structures  
ARCH 614

S2007abn

## Rigid Frames

- rigid frames have no pins
- frame is all one body
- typically statically indeterminate
- types
  - portal
  - gable

Pinned Frames 16  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Rigid Frames with PINS

- frame pieces with connecting pins
- not necessarily symmetrical

Pinned Frames 17  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Internal Pin Connections

- statically determinant
  - 3 equations per body
  - 2 reactions per pin + support forces

Pinned Frames 18  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Arches

- ancient
- traditional shape to span long distances

Rainbow Bridge National Monument

Packhorse Bridge, UK

Roman Aqueducts

Pinned Frames 19  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Arches

- primarily sees compression
- a brick "likes an arch"

Pinned Frames 20  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Arches

- *behavior*
  - *thrust related to height to width*

Pinned Frames 21  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Three-Hinged Arch

- *statically determinant*
  - *2 bodies, 6 equilibrium equations*
  - *4 support, 2 pin reactions (= 6)*

Pinned Frames 22  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Beams with Internal Pins

- *statically determinant when*
  - *3 equilibrium equations per link =>*
  - *total of support & pin reactions (properly constrained)*
- *zero moment at pins*

Pinned Frames 23  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn

## Procedure

- *solve for all support forces you can*
- *draw a FBD of each member*
  - *pins are integral with member*
  - *pins with loads should belong to 3+ force bodies*
  - *pin forces are equal and opposite on connecting bodies*
  - *identify 2 force bodies vs. 3+ force bodies*
  - *use all equilibrium equations*

Pinned Frames 24  
Lecture 10

Elements of Architectural Structures  
ARCH 614

S2007abn
