

pinned frames, hinged arches

Pinned Frames 1
 Lecture 9

Architectural Structures I
 ENDS 231

F2005abn

Pinned Frames

- structures with at least one 3 force body
- connected with pins
- reactions are equal and opposite
 - non-rigid
 - rigid

Pinned Frames 4

Architectural Structures I
 ENDS 231

S2004abn

Rigid Frames

- rigid frames have no pins
- frame is all one body
- typically statically indeterminate
- types
 - portal
 - gable

Pinned Frames 5

Architectural Structures I
 ENDS 231

S2004abn

Rigid Frames with PINS

- frame pieces with connecting pins
- not necessarily symmetrical

Pinned Frames 6

Architectural Structures I
 ENDS 231

S2004abn

Internal Pin Connections

- *statically determinant*
 - 3 equations per body
 - 2 reactions per pin + support forces

Pinned Frames 7

Architectural Structures I
ENDS 231

S2004abn

Arches

- *ancient*
- *traditional shape to span long distances*

Pinned Frames 8

Architectural Structures I
ENDS 231

S2004abn

Arches

- *primarily sees compression*
- *a brick "likes an arch"*

Pinned Frames 9

Architectural Structures I
ENDS 231

S2004abn

Arches

- *behavior*
 - *thrust related to height to width*

Pinned Frames 10

Architectural Structures I
ENDS 231

S2004abn

Three-Hinged Arch

- *statically determinant*
 - 2 bodies, 6 equilibrium equations
 - 4 support, 2 pin reactions (=6)

Pinned Frames 11

Architectural Structures I
ENDS 231

S2004abn

Procedure

- *solve for all support forces you can*
- *draw a FBD of each member*
 - *pins are integral with member*
 - *pins with loads should belong to 3+ force bodies*
 - *pin forces are equal and opposite on connecting bodies*
 - *identify 2 force bodies vs. 3+ force bodies*
 - *use all equilibrium equations*

Pinned Frames 12
